Education

Cleveland State University

Master of Science in Software Engineering (GPA: 4.0/4.0)

Cleveland, Ohio

Jan 2025 – Dec 2026

- **Relevant Coursework:** Data Mining and Machine Learning, Deep Learning, Database Systems and Processes, Software Engineering, Software Project Management, Software Quality Assurance, Software Architecture, Artificial Intelligence.

University of Mumbai

Bachelor of Engineering in Information Technology

Mumbai, India

Aug 2018 - Jun 2022

- **Relevant Coursework:** Web Development, Java, Python, Front end, Computer Network, Cloud Computing, Data Structures and Algorithms, Operating Systems.

Work Experience

Cleveland State University

Engineering Peer Teacher | Statistics and probability

Cleveland, Ohio

Aug 2025 – present

- Fostered and led a **collaborative** learning environment for 20+ students, leading weekly recitations to reinforce complex statistics and probability concepts
- Create and present weekly power point slides and handouts with practice problems to support visual learning, collaborating with professor to refine teaching strategies, leading to increased student engagement and academic performance.

NSEIT LIMITED

Associate Systems Analyst | Java Developer

Mumbai, India

Nov 2022 - Sept 2024

- Developed scalable Spring Boot microservices for a B2B platform on RHEL, modernizing legacy systems and improving runtime by 75%.
- Built RESTful APIs and front-end components (Angular / JavaScript) to support dashboard and approval workflows; reducing screen load time by **90%** vs Kibana in loading dynamic data.
- Executed hierarchical approval APIs with automated email notifications using Java-Mail (SMTP), collaborating with cross-functional teams in an Agile environment.
- Automated operational tasks with shell scripts and cron jobs for AWS to on premise data migration; optimized MS-SQL on RHEL8 to reduce manual interventions and service start times by **~60%**.

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, SQL, HTML5, CSS

Developer Tools & Platforms: Git, GitHub, Postman, Maven, Linux, JIRA, Gradle, Liferay dxp

Frameworks & Libraries: Spring Boot, React, Angular, PyTorch, Scikit-Learn, Pandas, NumPy

Data & Databases: MySQL, PostgreSQL, MS-SQL, Data Visualization (Streamlit, Matplotlib)

Testing & Automation: JMeter, Postman, Unit & Integration Testing, Software Development Life Cycle (SDLC), Agile, Scrum

Projects

Portfolio | <https://pratikmishra.vercel.app/> | <https://github.com/pratikmishra17/portfolio>

Tech Stack: TypeScript, HTML, CSS.

- Personal portfolio website built with TypeScript showcasing technical skills, projects, and experience.

Vehicle Insurance Fraud-Detection | <https://github.com/pratikmishra17/Fraud-Detection-Dashboard>

Tech Stack: Python, Jupyter notebook, Pandas, Matplotlib, Streamlit.

- Data visualization dashboard for fraud detection model on dataset of 15k rows and 33 columns.
- Implemented Random Forest pipeline for fraud detection (15k rows, 33 features); performed feature engineering and cross-validation to reach **92%** accuracy.

Grievance Reporting System

| <https://github.com/pratikmishra17/grievance-reporting-system>

Tech Stack: React, Java Springboot, MS-SQL

- Designed and implemented authentication and role-based access control for user and admin workflows using Spring Boot and spring security.
- Built REST APIs for issue submission, review, and status ticket tracking; integrated MS-SQL for persistence.
- Currently developing dashboard and notification features to complete the full reporting workflow.

Achievements and Certifications

- 2nd place in tech challenge conducted by NSEIT - Fraud Detection System using ML models.
- Google's certification on Generative AI – Fundamentals.
- Introduction to Data Analysis using Microsoft Excel.
- NSE Academy's Certificate in Financial Markets (NCFM) Financial Markets: Beginners Module.
